Crescent Innovations Inc.

WESTFORD, Mass., May 7, 2024 /PRNewswire-PRWeb/ -- Crescent Innovations Inc. announced today the sale of its technology related to bone regeneration, plus various intellectual property and know-how assets. Chris Finn, President of the advisory firm Alternotio announced today that Crescent Innovations has retained Alternotio to sell the assets using a sealed bid sales process on June 28, 2024 at 12 PM EDT.

The ability to grow bone at a site-specific location, in a minimally invasive manner, would have a profound impact on the health and quality of life for up to 50 million Americans who suffer bone defects and diseases. These diseases include post craniotomy resorption, periodontal disease, degenerative disk disease, osteoporosis, and aseptic osteolysis. Together, these diseases cost the United States Healthcare System in excess of \$124 billion annually.

"This technology has been shown to grow bone rapidly in vivo without induce bone synthesis at ectopic sites by non-bone cells."

✕ Post this

Disorder Annual U.S. Cases

Craniotomies 750,000

Periodontal Disease 28,000,000

Spinal Surgeries 1,000,000

Aseptic Osteolysis 500,000

Osteoporosis 3,000,000

Total 33,250,000

The state of the art is Bone Morphogenic Proteins (BMPs) which are osteogenic compounds. However, BMPs can cause Heterotopic Ossification (bone growth at non-boney sites) making them somewhat difficult and risky to use.

The invention comprises a patented osteogenic formulation of prostaglandin E1, an already approved drug, and a delivery system (HA or Crescent Innovations patented PgGA). This technology has been shown to grow bone rapidly in vivo without induce bone synthesis at ectopic sites by non-bone cells.

The assets will be sold at a sealed bid sale on June 28, 2024 at 12 PM EDT. Parties interested in purchasing any or all of the assets must sign a confidentiality agreement, which can be obtained by contacting Chris Finn at info@alternotio.com or calling **+1 (978) 882 - 2586**. Negotiated offers are welcome, but any negotiated sale must be concluded prior to opening bids on the date specified above and must conform to the terms set forth for sealed bids.

About Crescent Innovations Inc.

Crescent Innovations Inc. is a firm focused on the development of biological polymers to create non surgical regenerative solutions for chronic conditions. The firm currently is focused on innovating technology to solve TMJ disorders and singular maladies. If interested in TMJ disorders, please contact Crescent Innovations directly at www.crescentinnovations.com

About Alternotio.

Alternotio is an advisory firm, that specializes in the sale of non-lead and distressed intellectual property. Alternotio occasionally works with unique tangible assets that have a substantial intellectual property component.
